

YOUR NAME

Software Engineer | .NET & Angular Developer | 1.5 Years Experience

Ahmedabad, Gujarat | +91 XXXXX XXXXX | your.email@example.com | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Software Engineer with 1.5 years of experience in web application development using **.NET, ASP.NET MVC, Angular, JavaScript, SQL Server, and REST APIs**. Experienced in developing new APIs, maintaining existing application flows, troubleshooting issues, testing features, and supporting team members. Worked directly with clients to understand requirements and discuss suitable implementation approaches. Hands-on experience with Spring Boot through a personal backend project.

TECHNICAL SKILLS

Backend	C#, .NET, ASP.NET MVC, REST APIs, Java, Spring Boot
Frontend	Angular, TypeScript, JavaScript, jQuery, HTML, CSS
Database	Microsoft SQL Server, PostgreSQL, SQL
Tools / Deployment	Git, IIS, Docker, Maven, Render

PROFESSIONAL EXPERIENCE

ABC — Software Engineer | 2025 – Present

Team Size: 8

- Develop and maintain web application features using **.NET / ASP.NET MVC**, JavaScript, jQuery, HTML, CSS, and SQL Server.
- Develop new APIs and enhance existing application flows based on business requirements.
- Work directly with clients to understand requirements, clarify technical needs, and discuss suitable implementation approaches.
- Perform development, testing, debugging, and application support to deliver reliable functionality.
- Collaborate with team members and provide technical support when resolving implementation issues.
- Work with applications hosted on **IIS** and interact with SQL Server for application data and business operations.

PERSONAL PROJECT

Patel Samaj — Community Trust & Event Management Backend | Backend Developer

Java 17, Spring Boot 4, PostgreSQL, Spring Data JPA, Hibernate, Spring Security, JWT, Playwright, Thymeleaf, MapStruct, Docker

- Developed a Spring Boot REST API backend for hall bookings, donor records, inventory utilization, and daily operational expenses.
- Implemented JWT-based authentication and role-based authorization using Spring Security.
- Built Gujarati A4 invoice PDF generation using Playwright and Thymeleaf with custom font support.
- Implemented pagination, dynamic sorting, Criteria API queries, and DTO mapping using Spring Data JPA and MapStruct.
- Integrated asynchronous email delivery using Spring Mail and **@Async** for receipt and account-related emails.
- Containerized and deployed the backend to **Render**, with automatic deployment when changes are merged into the main branch.

EDUCATION

B.E. — Computer Engineering

XYZ College | 2025 | CGPA: 8.0
